Brad Edlington  
HSSE Manager, ExxonMobil Guyana

# *Liza Destiny Journey*

Celebrating a safe  
construction project!

Liza Destiny fabrication  
in Singapore

# *Liza Destiny Journey*

Liza Destiny positioned offshore Guyana

Our first group of Guyanese technicians training to work offshore

ExxonMobil Guyana Vision...Nobody Gets Hurt!

# “Nobody Gets Hurt”...How do we get there?

**Safety Starts with Me!**

# Lead to Win – What an effective safety leader looks like

## Care

### Inspire others

1. Intervene
2. Consider different opinions
3. Recognize and reward

### Look after you

1. Wear your PPE
2. Stay focused on task (on/off the job)
3. Stop the Job if unsafe

### Contribute to the well being

1. Do the Housekeeping
2. Submit Observation Cards
3. Don't make it personal

## Resilience

### Be determined

1. Understand your role
2. Take a job to full closure
3. Follow the procedures

### Persevere

1. Don't do shortcuts
2. Take a day at a time
3. Make the **SafeChoice**

### Stay healthy

1. Take breaks
2. Eat healthily and stay hydrated
3. Exercise

## Courage

### Take initiative

1. Act if you see something wrong
2. Ask for help when needed
3. Use interrupters

### Be curious

1. Seek understanding
2. Ask questions if unclear
3. Actively participate in discussions

### Take ownership

1. Be professional; be in the "Game"
2. Own-it as if it was yours
3. Correct hazardous situations

**Liza Destiny Values**

**Integrity**

**Care**

**Courage**

**Excellence**

**Ownership**

# Liza destiny Journey - Celebrate Success!

## One Year LTI Free!

SBM Chief Operating Officer presented to the team certificates of 1 year LTI Free!

- LTI – Lost Time Injury
- Team achieved 365+ days without anybody missing a day of work from being hurt!

# Continuing the Journey...

**EEPGL Life Saving Actions**

**ACCOUNTABILITY**

- WORK AUTHORIZATION**  
Only do work that is authorized and follow the Permit and Job Safety Analysis or Risk Assessment
- CRITICAL DEVICES**  
Obtain authorization before overriding or disabling safety critical equipment
- CONFINED SPACE ENTRY**  
Obtain authorization before entering a confined space. Establish and maintain safe entry conditions
- DRIVING**  
Obey traffic regulations both on-site and off-site
- ENERGY ISOLATION**  
Verify isolation before work begins and use the specified life protecting equipment. Demonstrate zero energy
- HOT WORK**  
Remove flammable materials and gas test continuously
- LINE OF FIRE**  
Keep out of the line of fire
- LIFTING AND RIGGING**  
Use certified lifting gears and stay clear of suspended loads. Follow prescribed lift plan
- WORKING AT HEIGHTS**  
Protect against a fall. Wear a harness with 100% tie-off
- BREAKING CONTAINMENT**  
Manage ignition sources and exposure to hazardous substances
- ROTATING EQUIPMENT**  
Prevent snagging, entanglement and entrapment
- CRITICAL PROCEDURES**  
Review and understand them – do not deviate without approval

**MANAGE CHANGE**

**Life Saving Actions Keep You Safe**  
**Nobody Gets Hurt!**

## Three Focus Areas:

### 1. Focus on the Fundamentals

- Following Life Saving Actions / Rules
- Learning from Incidents - Ask 'How' not "If" it can happen here
- Steward learnings from experiences

### 2. Safe Choice

- We are all human & humans make mistakes - how do we ensure we have the right tools for the tasks we just can't get wrong?
- Use the tools, follow procedures, seek to understand before taking action

### 3. Keep Your Head in the Game

- Have a positive attitude – One Team, One Family
- Recognize when you should step away from task if you're distracted
- Take the time to complete all tasks safely. **Don't rush!**

**Safety Starts with Me!**
